

**The 1<sup>st</sup> EVER ONE+  
Brushless Chainsaw**

18V Cordless Chainsaw

**Now you can chop small branches and firewood with the power of ONE+ with Ryobi's NEW 18V chainsaw**

Ryobi's first ever ONE+ chainsaw provides consumers with a seamless user experience when it comes to chopping small trees, branches and logs.

Ryobi already boasts an excellent reputation when it comes to delivering tools built on user needs, and we are proud to unveil the first ever ONE+ chainsaw, a new and high-performing tool enabling DIY gardeners to prune trees and hedges with a powerful, yet cordless, tool.

**BRUSHLESS**

Thanks to advanced and innovative premium brushless motor technology, the OCS1830 delivers enough power and chain speed to cut logs up to 25cm. Home users will no doubt enjoy the ability to cut unsightly branches and logs without the need to operate near a power outlet, and without the need for a noisy and cumbersome petrol equivalent, with a longer runtime guaranteed.

The ONE+ chainsaw is also the latest addition to the ONE+ system – where one battery powers over 50 garden and power tools. So after you are finished chopping wood you can take your battery to power a drill and build yourself a shed or plug it into a mower.

ONE+ has been powering a range of garden and power tools since 1996: that's 20 years of ONE+ innovation in one system of tools. That's why the ONE+ system is the #1 cordless system in the DIY market world-wide for millions of DIY'ers, families and homeowners.

## OCS1830 BRUSHLESS

The OCS1830 is extremely portable thanks to its light design. Weighing just 2.5kg without the battery pack, it is easy and comfortable to use wherever you're operating. It has a 30cm Oregon® bar and chain, plus an automatic oiling system for even greater convenience. It can also be adjusted quickly and easily thanks to tool-less chain tensioning, while a full wrap-around handle – complete with over-mould – means it can be used in any orientation, perfect when reaching for awkward areas or branches.

With a dual brake function, boasting both a mechanical chain brake and a motor brake, users can work safely at all times. And with a three-year warranty, which brings with it all the benefits users have come to expect from Ryobi, you can cut and trim in greater piece of mind without worrying about downtime.

Ryobi's 18V Lithium+ batteries and new chainsaw are the latest in an expanding ONE+ cordless range. Our batteries are compatible with all home and garden tools in the cordless system, which means you can expand your family of tools when you need to – perhaps our grass trimmers, loppers or mowers to help you keep your garden in shape – without buying individual bare tools, batteries or chargers.

Incredible cutting power with a battery that thinks for itself, is everything you need to keep your trees and hedges neat and tidy.

### Best battery for your tool?

We recommend using Ryobi's 5.0Ah Lithium+ battery pack, as this is our largest ONE+ battery and will provide outstanding power and runtime. Best of all, you only need one battery to chop enough firewood to keep you warm. Simply plug in a ONE+ battery and go!

Buy the new 18V chainsaw as a bare unit so you can build on your ONE+ collection without spending more on batteries & chargers with each tool purchase.

Ryobi understands the need for flexibility at affordable prices and that's why we keep expanding our cordless range without the need of new batteries and chargers.
