

Brand new design!

18V ONE+ SYSTEM 18V Cordless Grass Trimmers

RYOBI

The **NEW Ryobi 18V** grass trimmers are perfect for effortless grass cutting

Ryobi's 18V ONE+ garden trimmers are better than ever, boasting an improved design and a range of new features, including a pivotal head for easy edging and the ability to adjust the height shafts for greater comfort.

For DIY or home gardeners, trimming can bring many challenges, particularly when it comes to larger, hard-to-reach areas or powering your tools. Electric models can be prohibitive when it comes to bigger gardens while petrol versions are often noisier and heavier.

This is why Ryobi, who boasts an excellent reputation when it comes to providing power tools based on the knowledge and experience of user needs, has created this innovative range of battery-powered trimmers which will simplify the experience, even when tackling long grass and weeds.

Whether you are a do-it-yourself-er, a keen gardener or a car enthusiast, Ryobi has the tools for you. Best of all you only need one battery to power them all!

ONE+ has been powering a range of garden and power tools since 1996, that's 20 years of ONE+ innovation in one system of tools. That's why the ONE+ system is the #1 cordless system in the DIY market world-wide for millions of DIY'ers, families and homeowners.

Small, but innovative

The new RLT1831H20 hybrid trimmer allows for either cordless convenience or unlimited runtime, which means it can adapt whatever your needs and last for longer between charges. DIY users will particularly love its versatility, thanks to an adjustable cutting width of 25cm-30cm and Easy Edge technology for quick transitions between edging and trimming modes.

The RLT1825M13 – with a two-handle design for improved ergonomics – and the RLT183220 – featuring a telescopic boom and adjustable pommel handle for greater comfort for users of all heights – models have cutting widths of 25cm and 25cm-30cm respectively. Both also boast Easy Edge technology, which means users can switch from trimming to edging simply by rotating a handle. Both are perfect for efficient grass and weed cutting.

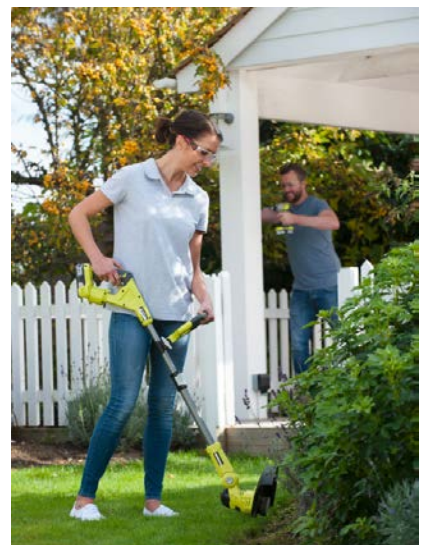

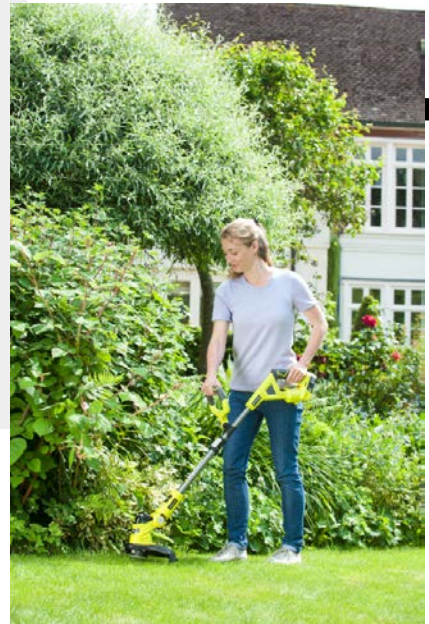

All three models enable you to work as far away from a power outlet as your garden requires, and they're quieter and safer to use, too. The RLT1831H20 and RLT83220 models also have a three-position pivoting string head for even greater versatility, which enables users to adjust the angle at which they're working for greater comfort.

All three trimmers are powered by Ryobi's 18V Lithium+ battery, which comes with patented Intellicell technology. This monitors and balances each cell in order to maximise runtime and deliver optimum performance, meaning you can work for longer without the need to charge your battery.

Buy the new 18V grass trimmers as a battery and charger kit, with either our 1.3Ah, 2.0Ah or 2.5Ah battery to join the ONE+ family. Or buy them as a bare unit which means you can build on your ONE+ collection without spending more on batteries & chargers with each tool purchase.

Ryobi understands the need for flexibility at affordable prices and that's why we keep expanding our cordless range without the need of new batteries and chargers.
